Start at the state where your colonist of the original Old 300 lived.

1. The map scale reads that for every inch in the map, you would have traveled _____ miles.
2. Using this scale, how many miles would you have to travel to reach the Austin Colony?
3. If you could only travel 15 miles in one day, how many days would the trip take?
4. List the states you would cross on your journey and the miles each state is measured across.
5. Using this basic supply list and the price chart below, calculate your food expenses.
